PROJECTS

StayEase - Travel Smart, Stay Better Sept 2025 – Nov 2025

- Designed RESTful APIs using Node.js and Express.js for efficient data management and seamless client-server communication.
- Utilized MongoDB with Mongoose for database modeling, storage, and retrieval of user, hotel, booking, and review data.
- Implemented user-friendly interfaces for searching, viewing, and booking hotel rooms based on location, pricing, and availability.
- Enhanced experience with location-based search, room filtering, and detailed property information.

Weather App Feb 2026 – May 2026

- Developed a responsive weather application using React.js that provides real-time weather updates for any city through Weather API integration.
- Implemented features to display essential weather information, including temperature, humidity, wind speed, atmospheric pressure, and weather conditions with accurate live data.
- Designed a clean, user-friendly, and mobile-responsive interface that enables users to search locations easily and stay informed about current weather conditions for better daily planning.

ACHIEVEMENT

- Solved 50+ Data Structure Algorithm problems at online platform like LeetCode.
